

Science Nutrition Lab
Nutritional Informed Consent

I am employing the services of Science Nutrition and Dr. Jason Jumper, D.C., B.S. so that I can obtain information and guidance about health factors within my own control (diet, nutrition, and related behaviors) to nourish and support my health and wellness.

I, the Client, understand that Dr. Jason Jumper is a Chiropractor -not a medical physician- and does not dispense medical advice, nor will he diagnose or treat any medical condition, but will provide nutritional support and nutrition education for an already diagnosed condition.

I understand that Dr. Jason Jumper is a Chiropractor and does not dispense medical advice nor prescribe medical treatment. Rather, he provides education to enhance my knowledge of health as it relates to foods, dietary supplements, and behaviors associated with eating. While nutritional and botanical support can be an important compliment to my medical care, I understand nutrition counseling is not a substitute for the diagnosis, treatment, or care of disease by a medical provider.

As a Chiropractor I am NOT A MEDICAL PHYSICIAN or a MEDICAL DOCTOR. I do not treat, cure, prevent disease. What I do is assist my clients in their desire to support the innate healing response of their bodies by suggesting an individualized selection of foods, herbs, nutritional supplements, relaxation, visualization, and exercise programs.

Methods of nutritional evaluation or testing made available to me are not intended to diagnose, treat, prevent or cure disease. Rather, these assessment tests are intended as a guide to developing an appropriate health-supportive program for me, and to monitor my progress in achieving my goals.

I, the Client, understand that information provided on the relationship between nutrition and health is NOT meant to replace competent medical care or treatment for any health problem or condition. I understand that a Nutritional Assessment and Evaluation is not done to define health as it relates to disease but as it relates to wellness.

I, the Client, choose to improve my health by assuming greater self-responsibility to reduce or eliminate unhealthy behaviors that are contrary to my well-being. The Surgeon General (1990) estimated that 7 out of the 10 leading causes of death in America are related to lifestyle habits, diet, smoking, lack of exercise, and substance abuse. They are the focal points of our work together.
